***Claim Rejections - 35 USC § 102***

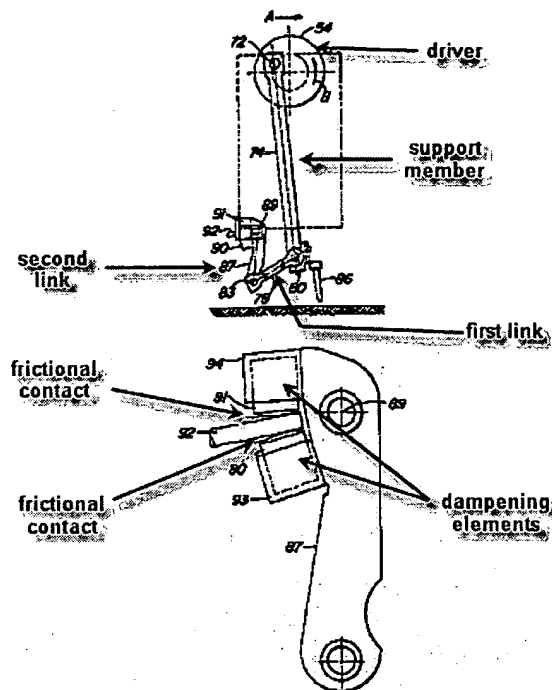

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Banks (5,988,290).

Banks discloses a cultivator for aerating a ground surface including a support frame 24, a tool support member 74, a first link 78 pivotally connected to the tool support member 74 at one end and pivotally connected to a second link 87 at an opposite end, with a cyclic driver 54, and a bias element (91,96) which provides a resilient damping of the pivoting movement of the second link. It is noted that during progressive dampening (compression of elements 90 & 96 by element 92), there is frictional contact made, which is considered to meet the “progressively frictionally arrest” limitation.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Banks (5,988,290).

Banks discloses a cultivator as described previously, but lacks specifying that the dampening block is composed of a urethane material having a Shore hardness of about 70D.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to form the dampening block of Banks out of a urethane material

Art Unit: 3671

having a Shore hardness of about 70D since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

***Allowable Subject Matter***

Claims 5-23 are allowed.

***Response to Arguments***

Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that Banks '290 does not disclose the dampening element frictionally arresting the pivoting movement. It is the examiner's position that applicant's arguments are more limiting than the claims themselves. Although the examiner agrees that Banks '290 discloses the compression of the dampening element, since there is frictional contact made during the compression of the dampening elements of Banks '290, the device is considered to meet the limitation of frictionally arresting the pivoting movement.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3671

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
